DESCRIPTORS Dictionaries; Elementary Education; Junior High Schools; *Mathematical Vocabulary; Mathematics Instruction; Mathematics Materials

ABSTRACT

This math dictionary provides information that helps math students in two important areas: (1) knowing what the problem is asking; and (2) knowing how to perform the operations. This book is organized to reflect the different areas of mathematics taught in elementary and junior high schools. Topics include: (1) numbers and operations; (2) measurement; (3) algebra; (4) geometry; (5) fractions, decimals, ratio, and percent; (6) statistics and probability; (7) problem solving; (8) examples of operations; (9) formulas; and (10) tables and charts. Recommended for grades 4-9. (MVL)
